

FOG PRODUCTS

ANTARI X-SERIES FOG MACHINES

Antari's professional line of fog machines include aluminum cast heaters, customized Italian pumps for silent operation, low fluid indicators, interchangeable control modules, a high efficiency vaporizing system, circuitry that is protected from external power interference, as well as wireless, DMX and timer control options.

- 131-400 X-510 1000W Fog Machine, 10,000 cu.ft./min., 2.5 liters
- 131-415 X-515 1500W Fog Machine, 20,000 cu. ft./min., 6 liters
- 131-420 X-530 3000W Fog Machine, 40,000 cu. ft./min., 6 liters, 200V

ANTARI FAZER

This 1000W Fazer outputs 3500 cu. ft./min. with a 12 min. heat up time. Tank capacity of 2.5 liters.

- 131-425 X-310 Fazer

ANTARI ICE LOW-LYING FOG MACHINE

This machine produces low lying smoke without the inconvenience of dry ice. Place up to 22 lbs. of ice into the ice chamber to cool the smoke produced by the 1000W smoke machine contained in the unit and watch the floor disappear. A full ice chamber can last up to 12 hours or 80 minutes with constant use. Full DMX control.

10,000 cu.ft./min. output with a 4.5 min. heat up time and tank capacity of 2.5 liters.

- 131-090 Antari ICE Low-Lying Fog Machine

ROSCO CHILLER MODULE

Used in conjunction with chemical fog machines, Rosco's chiller module utilizes solid dry ice to produce a low-lying fog effect. The unit requires a hose adapter to work with a fog machine.

- 131-198 Chiller Module
- 131-185 4" Hose Adapter
- 131-187 Ducting Hose 4" x 25'

MAGNUM PRO 2000 FOG MACHINE

A high performance, 1700w smoke machine using microprocessor-based technology and a specially designed long life heating element. The output of this unit is variable, allowing for control from a small trickle to a huge blast. The remote control unit plugs into the back of the machine and includes auto-timing and memory functions. A slave hook-up allows for an infinite number of add-on units. One 17 foot cable is included. On board tank capacity is 9.5 liters.

- 131-165 Magnum Pro 2000

LE MAITRE G300 FOG MACHINE

The G300 is the most technically advanced fog machine available. By simply changing the output mode and the fluid, it safely doubles as a water base hazer.

- 131-145 G300 Fog Machine
- 131-148 DMX Interface Remote

FOG MACHINES

DYNO-FOG II

This is a medium duty fogger with 4,000 cu. ft. per minute output. It features a 1 quart removeable tank and a 10 ft. cable with controller.

DJ2-525 Dyno-Fog II Fog Machine

FOG STORM 70

A great fog machine at a fantastic price. It covers 3,500 cu. ft. per minute. 700 watts, 1 liter tank and wired remote.

DJ2-530 Fog Storm 700

PEASOUPER

This compact dry-ice unit features four-stop flow rate control and a dry-ice capacity of approximately 20 lbs for a running time of 5 to 10 minutes. Hose and Hose adapter optional.

- 131-070 Peasouper
- 131-072 Ducting Hose Adapter, 2.5"
- 131-187 Ducting Hose, 4" x 25'

SNOW MACHINES

LITTLE BLIZZARD SNOW MACHINE

The Standard Little Blizzard can run continuously without overheating. It has insulation for quietness, a flake-size adjustment paddle, two-speed motor, and a remote control. Heavy duty rust-proof housing. DMX version available. One gallon fluid lasts 20-50 minutes. Snow will fly up to 100' out and 40' wide.

Little Blizzard SP Features additional soundproofing and is three times quieter than standard.

- 131-502 Little Blizzard
- 131-505 Little Blizzard DMX
- 131-500 Little Blizzard SP
- 131-508 Little Blizzard SP DMX

- 131-545 Gallon Extra Dry Fluid (travels up to 50')
- 131-547 Gallon Dry Fluid (travels beyond 50')
- 131-549 Gallon Dry 100 Fluid (travels beyond 100')

BUBBLE MACHINES

BUBBLE MAX SYSTEM

Capable of outputting 1200-1400 bubbles per minute, the bubble max system leaves the lowest residue of any bubble machine system. Bubbles can fly 40' through the air. The large reservoir allows for a continuous three hour output.

131-405 Bubble Max System

BUBBLE BLAST

American DJ's Bubble Blast machine has dual fan output.

131-300 Bubble Blast Bubble Machine

BU-350

Get hundreds of bubbles per minute from American DJ's BU-350.

131-306 BU-350 Bubble Machine

MINI BUBBLE MACHINE

This 6 1/2" mini bubble machine from CITC runs on AA batteries or with the included AC adapter.

131-304 Mini Bubble Machine

BUBBLE FLUID

131-410 Bubble Fluid, 1 Gallon

FOG FLUIDS

ROSCO FOG FLUID

Ideal for use in theater, film, television, live entertainment and special events, Rosco Fog Fluid can produce a wide range of effects - anything from a heavy cloud to light wisps. It is designed to provide maximum hang time.

- 131-235 Rosco Fog Fluid, Liter
- 131-237 Rosco Fog Fluid, 4 Liter

Rosco Stage & Studio Fluid

For those occasions where certain fog effects need to dissipate quickly or to create low-lying effects. Used with all Rosco fog machines, it will produce an effective theatrical fog and then disappear. Used in conjunction with a Rosco fog machine and a Rosco Coldflow, or Rosco Chiller Module the Stage & Studio Fluid generates an excellent low-lying fog effect.

- 131-231 Stage & Studio Fluid, Liter
- 131-233 Stage & Studio Fluid, 4 Liter

Rosco Light Fog Fluid

One of the latest additions to the Rosco line of fog effects, this economical water-based fluid delivers exactly what the name says: a lighter fog effect. When combined with compressed air in the Model 1600, PF-1000, or Intelligent Fog System, Rosco Light Fog Fluid can achieve a good haze effect.

- 131-228 Light Fog Fluid, Liter
- 131-230 Light Fog Fluid, 4 Liter

Rosco Clear Fog Fluid

Rosco Clear delivers the exact same effect as Rosco Fog Fluid, but does not have the colorant or scent additives.

- 131-214 Clear Fog Fluid, Liter
- 131-216 Clear Fog Fluid, 4 Liter

Rosco New Hazemaker Fluid

Specially developed for use with the Rosco Hazemaker and Hazemaker 2. The absence of oil in this fluid insures that you won't find an oily residue on your delicate electronic equipment or in your moving lights. It is water soluble, but specially formulated to prevent condensation from forming on your gear. New Hazemaker Fluid was created using the same family of components as Rosco's Fog Fluid but is specifically constituted to create a haze effect.

- 131-208 New Hazemaker Fluid, Liter

FANTASY FX "Fog in a Can"

Fantasy FX spray smoke in a can is a non-irritating haze in an aerosol can. Fantasy FX is not a soupy, billowy smoke. It creates a fine, odorless mist in the air to reveal and enhance light beams. Completely non-toxic, meets EPA standards, and is "ozone safe" with no CFC's.

- 131-370 Fantasy FX, 8 oz., Regular
- 131-372 Fantasy FX, 8 oz., Lockdown

ANTARI FOG FLUIDS

Antari premium fluids are optimized for best performance. They are manufactured with de-ionized pure water containing absolutely no impurities, prolonging the life of your machine. Manufactured with pure polyfunctional alcohols used by the food and cosmetics industries. Absolutely no recycled raw materials are used in manufacturing process. All fluids have been certified as NON-TOXIC when utilized for intended use.

- 131-780 Antari Standard Fog Fluid, Gallon
- 131-782 Antari Performance Fog Fluid, Gallon
- 131-784 Antari Low Lying Fog Fluid, Gallon
For use in "ICE" low-lying fog machine ONLY
- 131-796 Antari Oil Based Haze Fluid, Gallon
For use in Haze Machines only

LE MAITRE FOG FLUIDS

Molecular Fog Fluid

This thick, clean, white fog begins to dissipate as it warms at a quicker rate than regular Fog Fluid. Create a dense, low-lying fog and stimulate a "dry-ice effect" (when chilled).

- 131-270 Molecular Fog Fluid, 2 Liter
- 131-272 Molecular Fog Fluid, 4 Liter

Pro Beam Fog Fluid

Produces a clean, dry, odorless, slightly less white fog that "hangs" in the air 2-3 times longer than Regular Fog Fluid.

- 131-290 Pro Beam Fog Fluid, 4 Liter

Regular Haze Fluid

This water-based haze provides a consistent, long-lasting, dry haze effect that leaves no residue (when used with H175 or H300 machine).

- 131-254 Regular Haze Fluid, 4 Liter

Neutron Haze Fluid

This fluid is specifically designed for use in the Neutron range of haze machines.

- 131-280 Neutron Haze Fluid, 2 Liter
- 131-285 Neutron Haze Fluid, 4 Liter

DF50 DIFFUSION FLUID

- 131-250 DF50 Diffusion Fluid, Gallon
- 131-251 DF50 Diffusion Fluid, Quart

DJ FOG FLUID

Generic water based fog liquid, leaves no residue or odor.

- 131-220 DJ Fog Fluid - 1 quart

DIFFUSION IN A CAN

Diffusion in a can is a safe, odorless, convenient way to create an atmospheric haze without using a large diffusion machine. Ozone-safe, non-toxic, odorless, and convenient. Each 8 oz. can will easily fill an average-sized studio or sound stage. Particles continue to work until ventilation removes them.

- 131-375 Diffusion in a Can 8 oz.
