Smart Move® Vertical is the latest addition to the Smart Move® family of gobo movement products. The Vertical features motion, time, and speed presets that create vertical movement of patterns or text. The special gobo offers multiple image areas that, when combined with the vertical movement, allow one image at a time to be placed in the focal path of the fixture. Compared to the spinning motion of a standard gobo rotator, the Vertical offers a different, more subtle look.

Use multiple Smart Move® Verticals simultaneously to create side-by-side effects at different angles. Add gel or crushed dichroics to enhance your projection with color. These are just a few suggestions for creating visual effects using the Smart Move® Vertical. We'll leave all the others to your imagination.

All vertical patterns on this page designed by K. C. Hooper.

MSRP: \$12.90
